## Assembly Sofa

### Introduction

Take a seat on the Assembly Sofa, our first modular sofa system. Foam free and manufactured in the UK with a focus on sustainability.

The Assembly Sofa system is made up of a series of sofa modules that can be combined in endless configurations. Its adaptability and finish options make it equally at home in office, co-working, hospitality and residential spaces, with integrated or freestanding tables and optional power and data points adding further flexibility.

A sofa to work, meet, relax and assemble together.

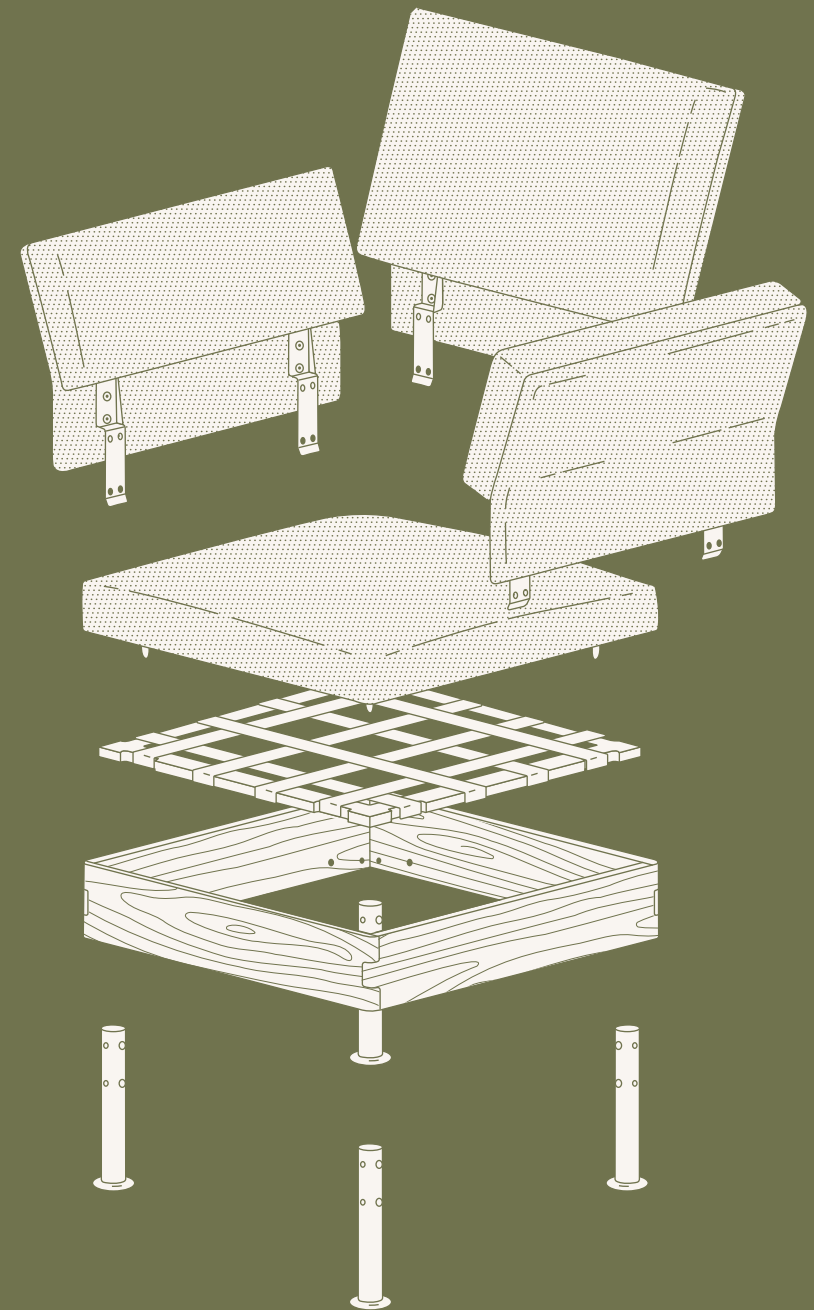

The design's central element is an exposed solid ash frame on metal legs that comes in 3 sizes: single-, two-, and three-seater.

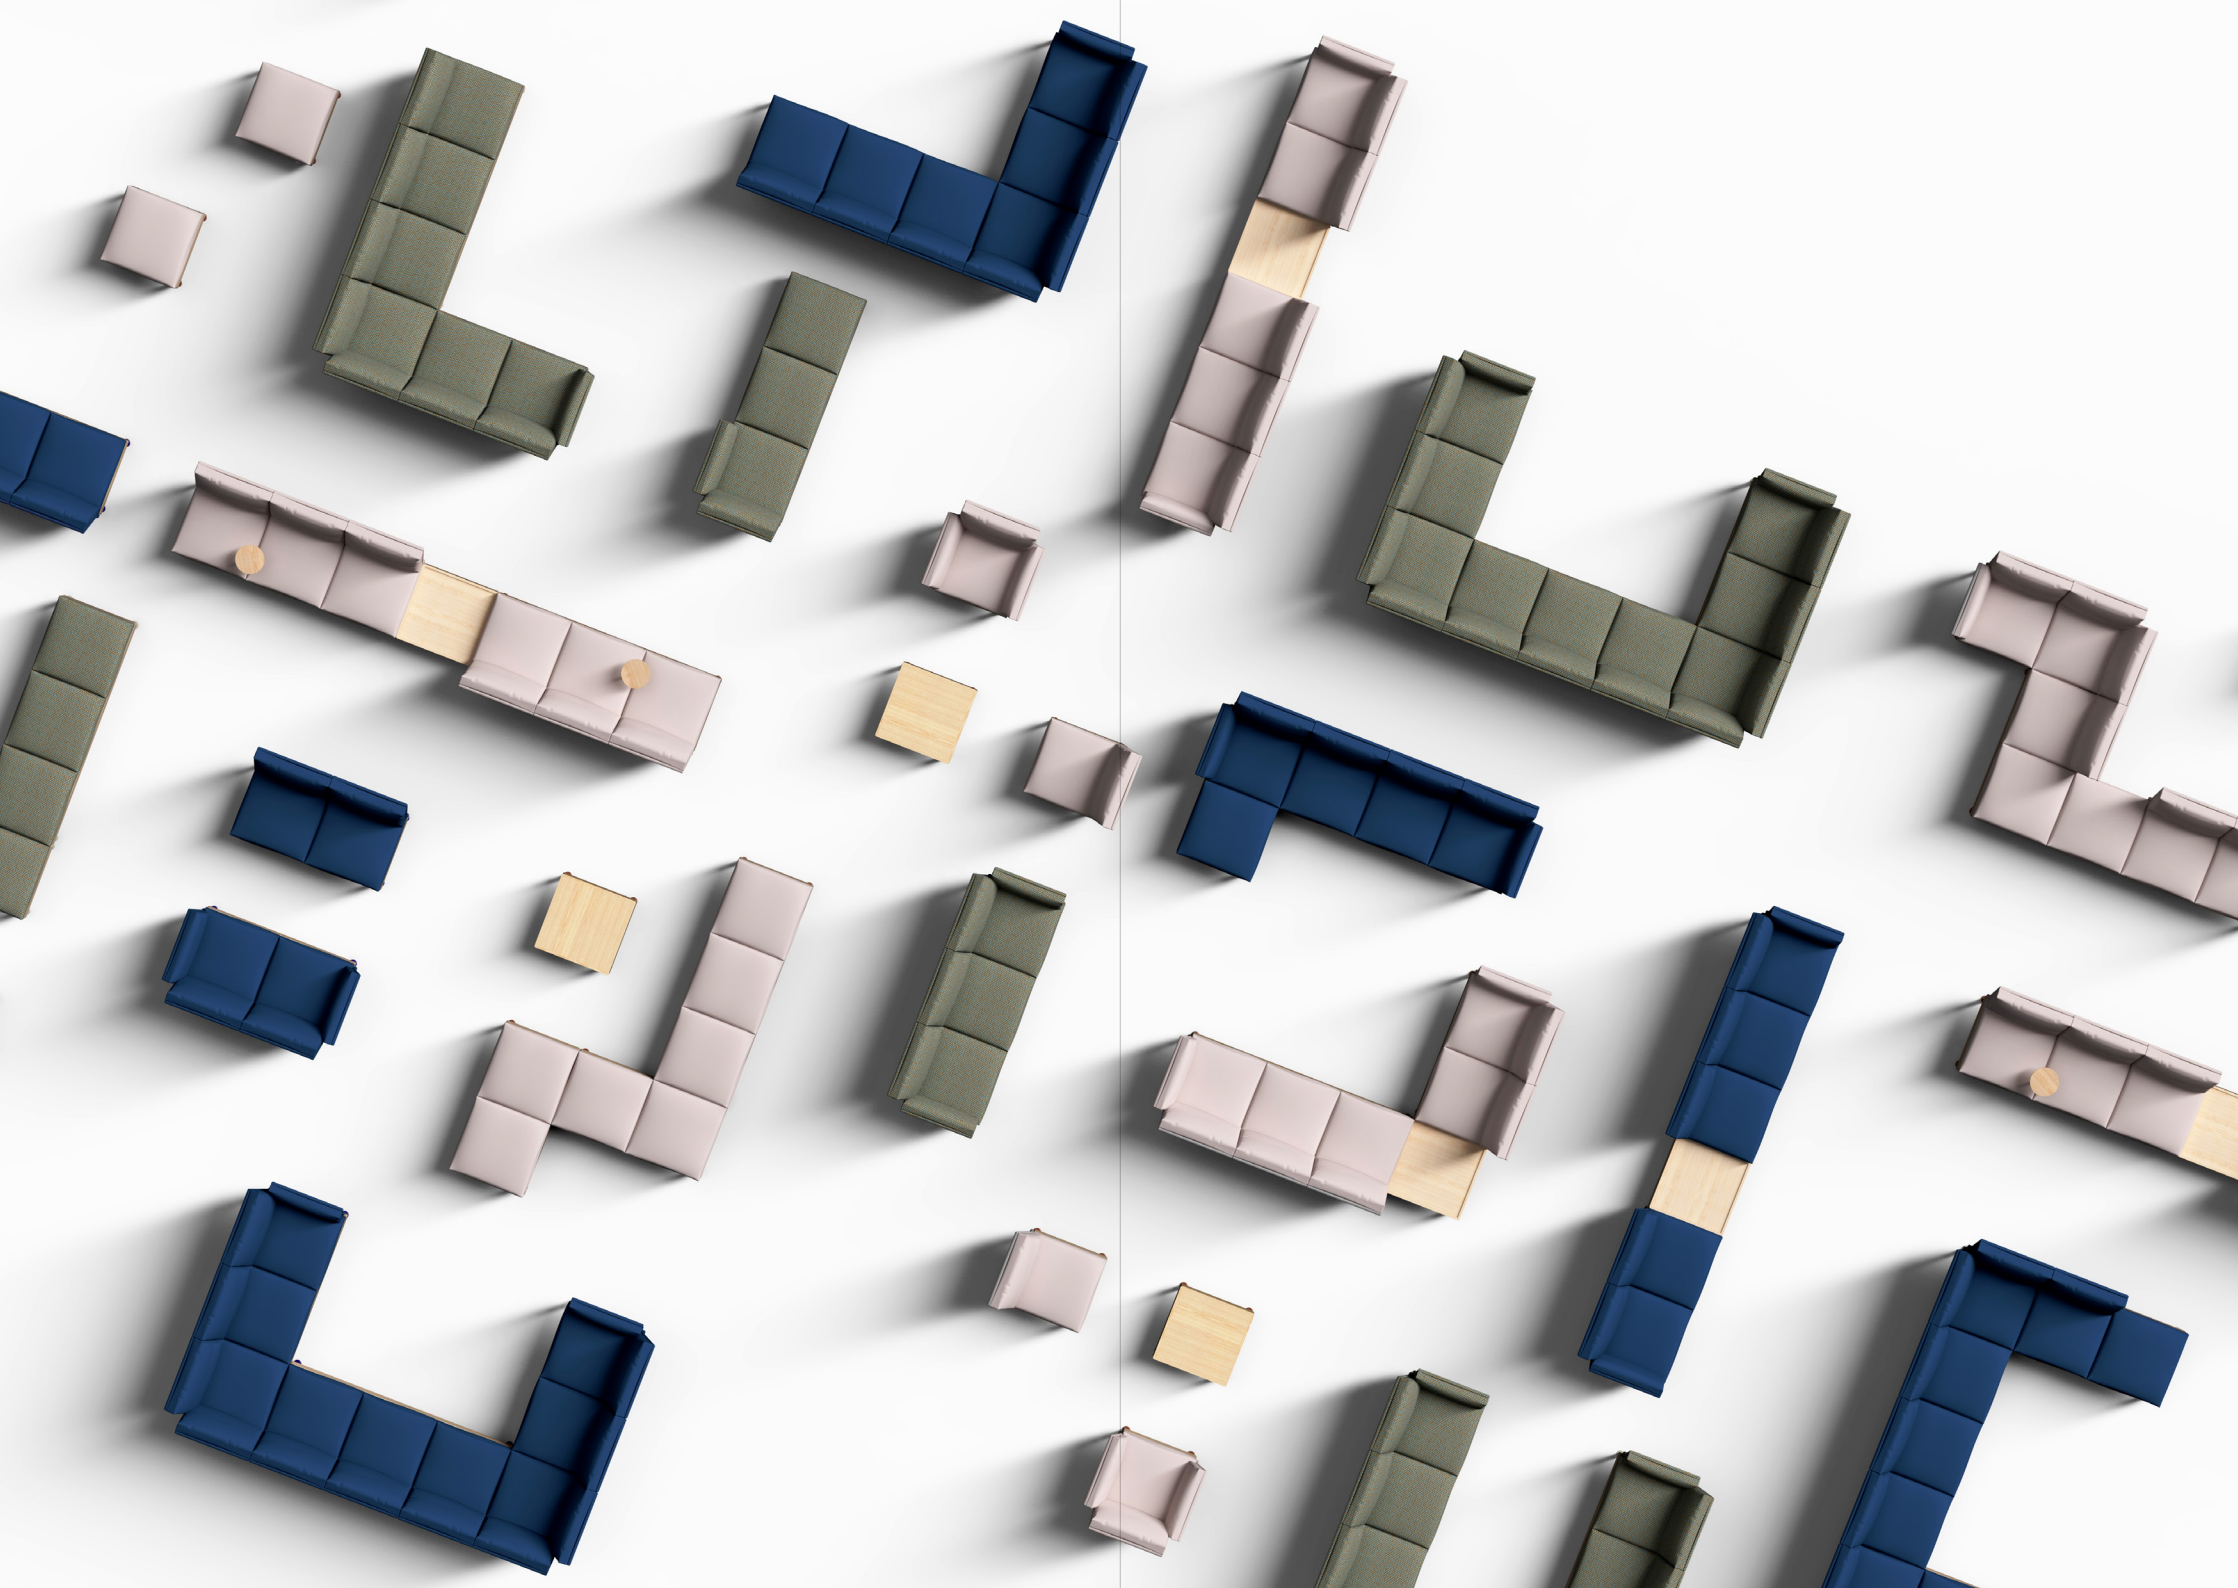

Adding a seat element to the single frame produces an ottoman; adding a back and sides creates an armchair. Other standard modules are the traditional 2- and 3-seater sofa, with- or without arms.

The wooden frames can be joined to make larger linear- or corner configurations. Arm- and back elements can be added in any position. Backs on the same frame can even face in opposite directions to create a dynamic solution for lobbies and open plan spaces.

Power options are available on request.

## A foam free design using sustainable alternatives to conventional upholstery foams.

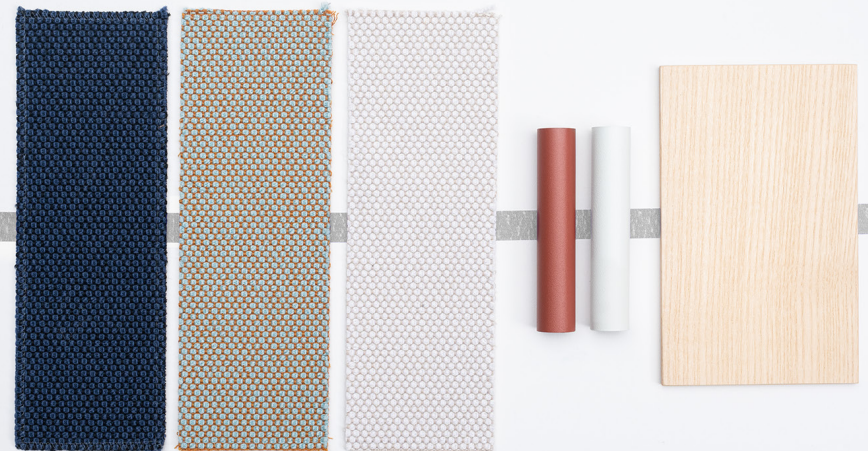

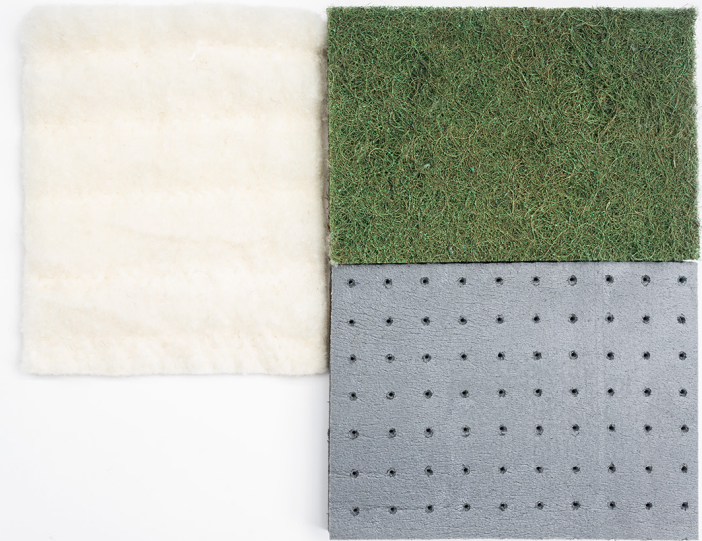

Our filling is 100% natural and made up of coco-fibre, natural latex rubber and wool – a sustainable alternative to conventional petrochemical-based foams. Tested for comfort and durability.

Our Solid Ash timber frames use FSC™ certified timber, the world's most respected and widespread forest certification system.

Each element of the sofa can be individually repaired or replaced or broken down for end-of-life recycling.

Available in a range of upholstery fabrics including 100% renewable fibres or fabrics using post-consumer plastic or recycled fibres.

## Made in the UK.

## Assembly Sofa

### Design Details

The solid ash timber frame gives a warm and natural feel, whilst the contrasting powder-coated steel legs give an option for a pop of colour.

Arm and back components of the sofa system perch neatly onto the solid ash frame to give a clean, simple and elegant silhouette.

Our generously padded seat cushions, backs and arms are filled with a combination of coco-fibre, natural latex rubber and wool. The top layers of natural rubber and wool make for a very soft cushion whilst the layer of coco-fibre below gives stability and supports the seating position. Each seat is then placed on an individual webbed frame for additional comfort.

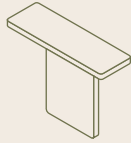

**Pedestal Table**

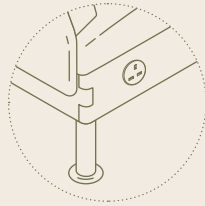

*Ideal for laptop use, integrated between seat elements.*

W250 x H350 x D250

**Wooden Arm**

*Alternative to the upholstered arm rest, ideal for placing laptops or drinks.*
